EXPERIENCE

Software Engineer II

June 2023 – Present

State Farm

Bloomington, IL (Hybrid)

- Contributed to a cross-functional team modernizing actuarial Rate Indications tooling from a legacy VB.NET application to a cloud-native Python/FastAPI microservice architecture with REST APIs, enabling actuaries to introduce new statistical techniques without modifying legacy code.
- Partnered with actuarial domain experts to translate statistical ratemaking techniques into production-ready Python microservices, implementing a clean REST API interface to a custom DAG execution engine for an ongoing VB.NET-to-cloud migration.
- Onboarded and mentored junior engineers across codebase conventions, AWS workflows, and team processes.
- Designed and led development of a greenfield Go microservice (Huma framework) rewriting a legacy VB.NET application, deployed on AWS ECS/Fargate with ALB and CloudWatch; managed full CI/CD pipeline via GitLab.

Software Engineer I

May 2022 – June 2023

State Farm

Bloomington, IL (Hybrid)

- Contributed to a Java/Spring backend service generating commercial insurance policy documents, working across a large distributed codebase serving internal business operations at enterprise scale.
- Maintained and extended Terraform-defined AWS infrastructure (ECS, ECR, Fargate, S3, SQS, Lambda, ALB, VPC, CloudWatch) across multiple microservices.
- Worked within an Agile/Scrum development team, participating in sprint planning, code reviews, and iterative delivery of features.

TECHNICAL SKILLS

Languages: Python, Go, SQL, Java

Frameworks: FastAPI, Pydantic, Huma

AWS: ECS, ECR, Fargate, Lambda, S3, SQS, ALB, CloudWatch, VPC

Infrastructure: Terraform, Docker, GitLab CI/CD

Data: PostgreSQL, Pandas

EDUCATION

University of Illinois Springfield

Springfield, IL

Bachelor of Science in Computer Science

May 2022
